SUMMARY

Computer Science (AI) undergraduate with experience in full-stack development, competitive programming, and applied machine learning. Built 10+ deployed web and GenAI applications using React, Next.js, Node.js, MongoDB, and Groq/OpenAI APIs, with strong foundations in algorithms, system design, and scalable backend development.

ACHIEVEMENTS

Sep 2023 – Present

- ICPC Asia West Regionalist 2025
- Solved 2000+ DSA problems across leading platforms, participated in 100+ rated contests
- Codeforces Specialist, CodeChef 3-star (Rating: 1788)
- Ratings: LeetCode 1730 (Top 11%), GFG 1943 (Top 2%); 600+ day streak on both; GFG 160-Day Certificate holder
- Finalist at Hacknauts Hackathon; Winner in college-level coding contests; Cleared TCS CodeVita Round 1

EXPERIENCE

Virtual Data Analytics Intern (Forage)

Feb 2025 – Jul 2025

Deloitte

Remote

- Completed Deloitte's 4-task Data Analytics simulation involving data cleaning, classification, and exploratory analysis on 1k–3k row sample datasets
- Performed 3–5 dashboard visualizations in Excel/Tableau to surface trends, anomalies, and key investigative insights
- Applied forensic-style analytical methods to interpret patterns and support business-case decision scenarios
- Prepared a structured 1–2 page analytical report following Deloitte-standard documentation practices

PROJECTS

BattleSoc – AI Battle Platform 🌐 Live — 🐙 GitHub

Oct – Nov 2025

- Engineered an AI platform comparing GitHub, LinkedIn, resumes, and typing profiles using Next.js 16 and TypeScript
- Designed 15+ backend API endpoints for scoring, text analysis, and structured evaluation using Groq models
- Implemented runtime loading and improved serverless behavior, reducing cold-starts by 38% and keeping uptime at 99%
- Built comparison logic across 10+ GitHub metrics, resume ATS scoring (92% consistency), and LinkedIn evaluations
- Integrated Framer Motion and streamed responses to improve UI responsiveness by 40%

CodeTrack – Coding Analytics Dashboard 🌐 Live — 🐙 GitHub

Apr – May 2025

- Engineered a full-stack dashboard (React, Node.js, Express, Supabase) aggregating coding data from multiple platforms
- Designed 15+ REST APIs normalizing 50k+ submissions from LeetCode, Codeforces, and CodeChef
- Improved median API latency from 1.8s to 120ms via indexing and caching strategies
- Added weekly insights, activity graphs, and digest emails for better user retention
- Achieved a 95+ Lighthouse score by streamlining rendering and using lightweight UI components

Talrn AI Image Generator 🐙 GitHub

Nov 2025

- Implemented a local text-to-image system using PyTorch, Diffusers, and Stable Diffusion v1.5 on CPU
- Created a Streamlit interface supporting 10+ style presets, negative prompts, adjustable inference steps, and interactive parameter controls
- Enhanced CPU inference by 10–15% using model caching and precision tuning on low-RAM hardware
- Integrated watermarking, metadata logging, and NSFW safety checks for transparent, safe image generation
- Containerized the application with Docker for reproducible setup and consistent environment execution

EDUCATION

KIET Group of Institutions

2023 – 2027

B.Tech in Computer Science and Engineering (Artificial Intelligence)

Ghaziabad, Uttar Pradesh

- Current SGPA: 7.5/10.0 — Relevant Coursework: Data Structures, Algorithms, Machine Learning, Database Systems

TECHNICAL SKILLS

Languages: C++, Python, JavaScript

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, SQL, MongoDB, Supabase, REST APIs, Cron Jobs

Machine Learning / GenAI: PyTorch, HuggingFace Diffusers, scikit-learn, NumPy, pandas, OpenCV, LangChain, OpenAI API, Groq API

Tools & Platforms: Git, GitHub, Linux, Docker, VS Code, Sublime Text, Google Colab, Postman, Vercel, Netlify, CI/CD
